The NBC 40mm Gas Mask Filter 381 from Sundstrom Safety AB is a Swedish manufact NATO issued gas mask filter. These premium NBC certified gas mask filters are the ve filters for your **Israeli Gas Mask** or any other 40mm NATO standard mask.

tweet like youtube email

KEEP SHOOTING

Description

The Swedish are world experts in NBC protection, possibly second to only the Israelis. Sweden and Israel are the only countries in the world who issue NBC protective gear to their citizens.

Multiple military forces in Europe trust Swedish NBC gear to protect their troops. No other gas mask filter is as widely used by our European NATO allies than this NBC-381 filter from Sandstrum Safety.

Features:

- True NBC Certified Filter
- Made to NATO Specifications
- NSN#: 4240-25-144-1531
- Works With Any 40mm Gas Mask - Israeli, US, and More

With governments increasingly not wanting to sell their defense equipment to civilians, this may be the last opportunity for us to purchase these filters at this price. Stock up now so when you need them you're prepared.

AirBoss C4 CBRN Gas Mask

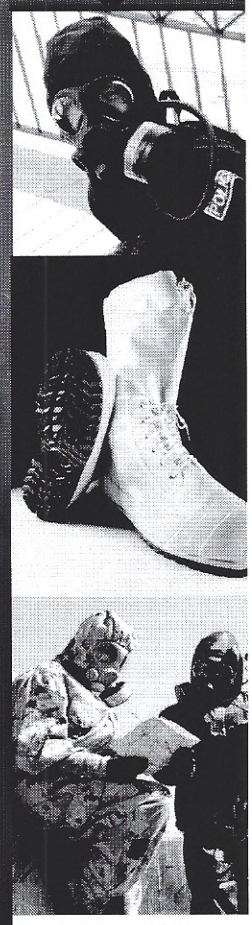

NATO's Lightest Protective Mask

Your Advantages With AirBoss Defense

- Lightweight and durable
- Comfortable with an easy-to-adjust fabric head harness
- High-performance facial seal
- Easy donning (within nine seconds)
- Fast decontamination
- Left or right canister mount (40-mm NATO thread)
- Shatterproof, replaceable, polycarbonate lenses
- Front and side speech transmitters
- Convenient high-flow drinking system
- CE certified (#C11-31155-1, 2, 3)

Shatter proof polycarbonate lenses

Unique stretch fabric head harness

Proven High Performance

Chemical and Biological:
the facepiece provides 24-hours of continuous protection against CW agents based on stringent military test methods and is impermeable to all biological agents

Toxic Industrial Chemical:
Excellent protection against a wide range of TICs
(list available upon request)

Ruggedly Tough & Durable

Operational Range:
-45°C to 70°C (-49°F to 158°F)

Storage:
-55°C to 60°C (-67°F to 140°F)

Shelf Life:
15 years in original package if properly stored

gas mask for an extended period of time. Gas masks are a short-term solution to hopefully what will be a short-term problem.

Hopefully these insights have helped to "clear the fog" around this somewhat confusing topic. Some reading this article might decide the "surplus" gas mask in the closet purchased online after 9/11 is probably better used as a Halloween costume than a life-saving survival tool. I wouldn't hold your breath for U.S. government-issued gas masks any time soon. I don't see that happening in the near future. If you want one, you're going to have to buy it.

Do you own a gas mask? Why or why not?

IN THE FACE OF HAZARD

M 95 NBC RESPIRATOR OUTPERFORMS STANDARDS FOR NBC PROTECTION

- The Scott M 95 respirator presents the highest standard in modern CBRN protection providing unrivalled reliability, safety and user-friendliness. Designed to meet the most critical hazards and stresses encountered in combat situations, the M 95 gas mask is user preferred.

  The M 95 is in service worldwide, e.g. by the National Defence Forces of Finland and several other military forces, first responder teams, law enforcement personnel, national guards, naval forces and marines.

- **OUTSTANDING PROTECTION & SAFETY**

  Precise fit and user comfort are the result of advanced computer aided design. Anatomical accuracy is based on a wealth of facial form data.

  - The superior protection of the halo-butyl elastomer facepiece has been proven with live agent testing; it is impermeable to chemical agents such as sarin and mustard gas.
  - Available in two sizes for optimum fit and safety for 100% matching of the population.
  - The respirator is easy and rapid to don and doff - in only 10 seconds.
  - Scott's extensive range of NBC filters provides protection against all known chemical, biological, radiological and nuclear agents and hazardous particles, like microorganisms. (See pages 6-7.)

- **SUPERIOR USER COMFORT**

  The Scott M 95 mask is comfortable to wear, even over long periods, thanks to its extremely low breathing resistance.

  - Light in weight: the mask weighs only 460 g – or 720 g with the filter.
  - The special small-size silicone inner mask reduces the CO2-content to a minimum (< 4,5%), thereby eliminating fatigue.
  - Moisture drainage is effective due to the practical downward positioning of the exhalation channel.
  - Protected speech-diaphragm for optimal telecommunication.
  - Polyester webbing band harness enhances wearer comfort and rapid donning.
  - Integral drinking tube for the hygienic and convenient intake of liquids, double-threaded connector is compatible with a special M 95 bottle or a PET bottle.

- **PRACTICAL CONSTRUCTION**

  - Filter connections on both sides of the facepiece facilitate left- or right-handed operation.
  - The six-point head-harness ensures tight fit of the facepiece.
  - Collision-proof construction of the mask and connector prevents accidental facial injuries.
  - Spectacle frames for prescription lenses are easily secured to the anchor point in the inner mask and remain stable in hostile environments.
  - Circulating the inhalation airflow across the inside of the lenses effectively prevents fogging.
  - The dual lenses combined with the close-fitting profile of the mask offer an excellent downward and horizontal field of vision - over 80%.

M 95
FULL FACE RESPIRATOR

HEAVY-DUTY MATERIALS

The Scott M 95 gas mask features heavy-duty materials for use in extreme situations and to withstand harsh decontamination methods.

- The specially engineered halo-butyl elastomer of the faceblank enhances resistance to known chemical, biological, nuclear and radiological agents.
- The Scott M 95 mask is resistant to high temperatures, steam and ozone; it also provides excellent resistance to a multitude of hazardous chemicals.
- The silicone inner mask provides non-allergic contact with the skin.
- Distortion-free and durable polyamide lenses feature high solidity as well as excellent light transmission.

HIGH LEVEL COMPATIBILITY

Thanks to its low-profile design, the Scott M'95 respirator is compatible with tactical equipment used in field operations, e.g. firing and armed systems, target finder optics, optical systems and communication devices, CWA protective clothing, all military helmets on the market and riot shields. Compatibility with NATO-used 40 mm threaded NBC filter canisters.

EASY MAINTENANCE

Maintenance of the M 95 mask is very user-friendly; the exhalation valve is easy to dismantle and reassemble. Valve inspection and replacement can be carried out without tools. Replacement parts are colour-coded to highlight vital components, for smart service and training. The mask is also designed for easy decontamination..

M 95 TECHNICAL DATA	
Materials	
Faceblank	Halo-butyl elastomer
Inner Mask	Silicone
Valve Discs	Silicone
Lenses	Polyamide
Head harness and support net	Polyester (PES) covered elastane (20 yarn Lycra) elastic, latex free (can be autoclaved). Polyamide (PA) webbing.
Spectacle Frame	Polyamide (PA)
Bottle	HDPE, protection against NBC Agents >48h
Protection Factor	>10 000
Protection against CBRN agents	>48h
Breathing Resistance	
Inhalation at 30 l/min	<0.45 mbar
Inhalation at 95 l/min	<1.0 mbar
Exhalation at 160 l/min	<1.2 mbar
Carbon Dioxide Content	<0.45%
Field of Vision	>80%
Intake of liquid	250ml/min
Temperature Range	from -30 C to +70 C
Storage Life	20 years
Filter Connection	Thread NATO (STANAG 4155/ EN148) diamater 40mm
Weight	
Mask	460g

M 95
ACCESSORIES

Easy-to-use accessories: carrying bag, plastic case, drinking bottle, spectacle kit and leakage testing equipment.

SPECTACLE KIT
Optical insert for prescription lenses made from durable polyamide.

CARRYING BAG
Tactical carrying bag for gas mask and 1-2 fi lters. Size (h x d x b) 26 x 14 x 20 cm. The bag is made from polyurethane (PU) coated polyamide (PA) cloth. Velcro fastening tapes. Polyamide texture carrying strap. Can be carried either as a shoulder bag at the waist as a belt bag.

LEAKAGE TESTING EQUIPMENT
The Protester leak test device provides a simple and reliable means of testing the leak tightness of full face masks. Negative pressure builds up when the face piece is closely mounted on the test head.

DRINKING BOTTLE
The drinking bottle has 1 litre capacity. Made from CBWA-resistant HD polyethylene. The bottle cap has a suspension strap to the bottle; it is also equipped with a hook catch for belt mounting.

PLASTIC CASE
Polyethylene (HDPE) stowage box for mask and filter. Size 25 x 14 x 17,5 cm. Cotton strap.

NBC FILTERS

SCOTT FILTERS FOR NBC PROTECTION

An extensive range of Scott NBC, civil defence and industrial filter canisters is available for use with the M 95. The filters, which are approved to EN, NIOSH or NATO standards, feature high chemisorption and physisorption capacity and low breathing resistance. Scott 40 mm CBRN canisters are designed to protect in Non-IDLH and oxygen-deficient conditions against known threat agents as well as a multitude of other hazardous gases, vapours and particulates.

Scott NBC filters protect against:
All known chemical and biological warfare agents like mustard gas, cyanogen, arsine and phosgene; sarin and other nerve gases; riot control gases like CN, CS, radioactive and highly toxic particles; aerosols and microorganisms; bacteria and viruses; as well as many toxic industrial gases and vapours ,e.g. organic gases and vapours, such as chlorine, hydrogen cyanide, hydrogen sulphide, sulphur dioxide and other acidic gases and vapours.

5045156 - CFR22 CBRN A2B2E1K1-P3 RD
protects against gases and vapours from organic compounds with a boiling point above 65°C, inorganic gases and vapours, e.g. chlorine, hydrogen sulphide, hydrogen cyanide, acid gases and vapours e.g. sulphur dioxide, ammonia and organic ammonia derivatives (EN 14387), other gases and vapours tested: chloropicrin, cyanogen chloride, sarin, hydrogen cyanide, mustard gas and phosphine as well as CS and CN, Arsine, DMMP, particulates: solid and liquid toxic and radioactive particles and micro-organisms, e.g. bacteria and viruses.

5543699 - CFR32 A2B2E2K2-P3 CBRN
protects against Gases and vapours from organic compounds with a boiling point above 65°C, Inorganic gases and vapours, e.g. Chlorine, Hydrogen Sulphide and Hydrogen Cyanide, Acid gases and vapours, e.g. Sulphur Dioxide, Ammonia and organic ammonia derivatives, Other gases and vapours: Phosphine, Formaldehyde, CN, CS, Cyanogen Chloride and Chloropicrin and Solid and liquid toxic and radioactive particulates and micro-organisms, e.g. bacteria and viruses.

Certified to EN 14387:2004 and 143. CE 0121.
Filters certified to NIOSH/USA standards available.

NBC 2200

POLICE CN/CS FILTER

Protects against riot control agents, e.g. tear gas, CN, CS; against organic, inorganic and acid gases and vapours; ammonia and organic ammonia derivatives; highly toxic and radioactive solid and liquid particles, bacteria and viruses. Ideal for RIOT Control & SWAT operations as well as Domestic Preparedness operations, the NBC 2200 makes sense in today's changing world.
The NBC 2200 Police Canister is chromium free and meets unique USA specifications designed for first responders concerned with Riot control, Toxic chemicals, Chemical Warfare Agents and Nuclear hazards
