January 12, 2015

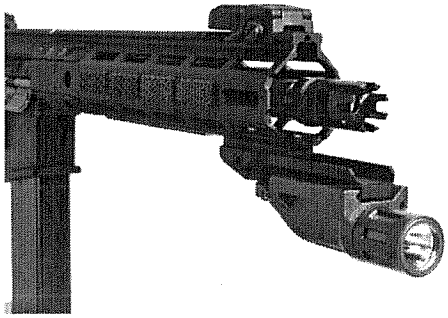

As long as we're on the subject of Strike Industries (SI) products, one of the things that makes SI such a formidable company, besides their incredibly prolific new product output in such a relatively short amount of corporate existence, is their ability to think of just about everything a shooter (in this particular case, a tactical AR-15 carbine/SBR shooter) might need. Enter the new SI Ricci-ERS (Extended Rail Section) cantilever MIL-STD-1913 "Picatinny" rail section for mounting any/all extra tactical AR (AR-15) accessories you might need to mount, like tactical white lights and lasers, for example. If you run out of room on your rail, the RICCI will make it right as rain for you, and all will once again be right with the world.

O.k., that's perhaps a bit of an exaggeration, but if you need some extra rail, the SI RICCI-ERS is tough to beat. Plus, it "can also be used as a rail riser, bridge mount for optics, and even as a blast sheild for your muzzle device." Pretty good.

The following RICCI-ERS information comes directly from the Strike Industries website:

"**Strike Industries Ricci Extended Rail Section**
SKU#: SI RICCI-ERS
$36.95

If you ever needed more room for your flashlight, laser or any other accessories on your weapon system strike industries have you covered! The SI RICCI-ERS cantilever rail section will give you 3" more inches in length of mounting room to your existing hand guard giving you more hand room on your handguard. The ERS can also be used as a rail riser, bridge mount for optics, and even as a blast sheild for your muzzle device!!! There are so many great uses for the SI RICCI ERS! The cantilever rail/light mount also features a beveled end and corners to reduce snagging and sharp edges.

Package Includes:
– 1 x Extended Rail Section
– 1 x Mounting Hardware

Features:
– Extends the length of your existing rail.
– Quick and easy mounting.
– 1913 Picatinny specifications.

- Rail Riser and Bridge Mount Funcionality

-Blast Shield"
