CRISTANINI CBRN DECONTAMINATION SYSTEMS

CRISTANINI is a global leader in the research and development of solutions for CBRN emergencies. With more than 40 years' experience in developing decontamination systems, CRISTANINI excels at reducing the logistic, training and operator burdens through innovative, modular and multi-functional solutions for Defence and Civil Protection. Simple, reliable.....and effective!

protected by emergent biosolutions™

Emergent BioSolutions™ is a specialty pharmaceutical company which offers specialized products to address unconventional health threats. Their exclusive portfolio includes medical countermeasures for Chemical and Biological threats including: Anthrax, Chemical Warfare Agents, Complications from Vaccinia and Botulism.

EVENT EXHIBITORS

AVON PROTECTION

Avon Protection is the recognised Global Market Leader in respiratory protection system technology offering innovative Personal Protective Equipment (PPE) products and services to the military, law enforcement, emergency services, firefighting and industrial sectors. Avon's pedigree in mask design dates back to the1920's and its advanced products are used in over 60 countries.

CBNW
CHEMICAL, BIOLOGICAL & NUCLEAR WARFARE

Chemical, Biological & Nuclear Warfare (*CBNW*) is the leading journal about defence against CBRNE (Chemical, Biological, Radiological, Nuclear Weapons and Explosives). Published by React Media and edited by Andy Oppenheimer AIExpE MIABTI every January and June, CBNW is also published online as an 'e-zine', *CBNW Digital*, every spring and autumn. *CBNW* brings you in-depth articles by internationally recognised experts and the latest breakthroughs by companies and defence departments in new CBRN defence countermeasures. It is distributed free to subscribers and distributed at all major defence trade shows.

Environics

Environics is a global provider of industrial gas detection and CBRN monitoring solutions. We manufacture a wide range of products including hazardous gas monitors for ambient air, process gas and stack emissions, as well as government early warning CBRN detection systems. Today, Environics is the supplier of choice for industrial, government and military organizations worldwide.

PROENGIN

Proengin has developed biological and chemical warfare agents field detectors using flame spectrometry:
AP4C, handheld chemical detector, for CWA, TICs and others (Novichok),
AP4C-V, aboard wheeled and tracked reconnaissance vehicles,
AP4C-F, on critical buildings and ships,
MAB, for biological alarm,
AP4C-FB, for full CBRN detection.

SCOTT SAFETY
A Tyco International Company

Scott are global leaders in the design and manufacture of Respiratory Protection Equipment (RPE). Their range includes military and civil defence masks and filters, powered breathing systems, self-contained breathing apparatus (SCBA) and escape sets. The Scott AirPak range provides damage control capability to the USN, Royal Navy, Taiwan, Japan and Sweden amongst others.Their expertise, at the cutting edge of RPE technology, is indicated by contracts they are currently working on. These include the General Service Respirator (GSR) contract for the British MoD, the M 2005 for the Finnish MoD and the M95 for the Saudi Arabian MoD. Offering ultimate operational flexibility to First Responders, Scott's portfolio can be customized to meet the specific CONOPS of the end user.

Tracerco

Tracerco offer a range of award winning radiation monitors, including Contamination, Dose Rate, and Personal Dosimeters as well monitors suitable for use in hazardous areas. Our monitors are robust, reliable and weatherproof. They are lightweight and easy to handle and operate. We also offer a range of accessories, including cases and check sources. We have a global after-sales service for calibration and repair for all types of radiation monitor, with quick turnaround. Tracerco are an award-winning process technology company, part of the Johnson Matthey Group, so with Tracerco Monitors, you can be sure of a high quality product.

NATO JCBRN Defence COE Mission Statement

- Provide advice in all CBRN Defence related areas.
- Develop CBRN Defence doctrines, standards, knowledge to support improvement of interoperability and capabilities.
- Provide opportunities to enhance education and training.
- Contribute to the relevant lessons learned processes.
- Within a Program of Work approved by the Steering Committee, assist NATO, Sponsoring Nations and other international institutions/organizations in their CBRN Defence related efforts,
    - including validation through experimentation.

The EOD COE is one of the tools of the NATO Supreme Allied Commander for Transformation aiming to improve military capabilities, value and efficiency od the Alliance. It was established by Slovakia as the Framework Nation with support of five Sponsoring Nations (CZE, FRA, HUN, POL and ROU).

The EOD COE was assessed by ACT HQ team in a period from 19-21 January 2011 and the Centre has successfully met the accreditation criteria. The North Atlantic Council approved the accreditation of the EOD COE and the Centre was activated as an International Military organization on 28 April 2011.

Scientific Partner

The Observatory on Security and CBRNe Defence - Osdife is a national and international reference for researchers and specialists on these fields and, for that, it contributes to experience enhancement, development and sharing by means of study, analysis, research, education, training, workshops, symposium and publications, also involving public and private institutions, agencies, organizations, associations, companies and individuals, in order to promote and encourage the development and adoption of appropriate strategies and initiatives for risks reduction and mitigation, to ensure citizens security and safety and to guarantee the integrity, defence and protection of public and private assets, territory, infrastructure and cultural heritage also in the field of CBRNe Risk and WMD Proliferation.

Official Event Partners

The Department of Electronic Engineering (DIE) of University of Rome "Tor Vergata" was founded in 1983 and now counts about 150 people, including faculty, staff, and cooperating personnel.In terms of traditional scientific areas, the department's expertise lies in the disciplines of control theory, electronics, electrical engineering, measurements, opto-electronics, telecommunications but also safety, security, defence and intelligence However, today research is typically carried out with multi-disciplinary approaches, dealing with specific application scenarios and systems. In this since the beginning, many of the DIE teachings and research activities have had the aim to develop, deepen and promote national and international scientific and technical education, studies and researches in the field of Territorial Protection, Safety, Security and Intelligence. In particular the Research Area "Security and Defence" offers expertise in the following sectors: Homeland Security, Military Defence, Civil Defence, Civil Protection, CBRNe Risk and WMD Counterproliferation.

The "Center for Security Training and Education" (CUFS) of state University of Republic of San Marino is born in 2010 moving from an approach centered on scientific research and training to an approach oriented to the application of the discipline and to the solving of problems connected to the security area.

Starting from this first phase, the CUFS, thanks to the several professionals and skills which have been improved through years, today is an international Center of Excellence for analysis, dissemination, innovation and growing of sciences in the field of security, defence, intelligence and territorial risk. This achievement has been also possible thanks to the activities of design, development and promotion of studies, research, dissemination, networking, education and training,. These activities have the objective to address and support the know-how's growth and innovation in methodologies and technologies of public and private Institutes and Organizations operating in the area of Security Defence & Intelligence. Moreover, the very same activities are applied also to specialists, technicians, experts, professionals and researchers such as to everyone who is interested in these issues.

For these reasons, the CUFS' commitment is providing a comprehensive and integrated vision of security trough definition of strategic scenarios and assessment of methodologies, resources and techniques about systems and solutions.
