As long as we're discussing the latest Patriot Ordnance Factory (POF-USA) rifles, DefenseReview (DR) should perhaps also mention that we got to view and handle the POF-USA P-300 (or, P300) .300 Win. Mag (300WM) at the company's booth at SHOT Show 2016. The P300 comes in a roughly the same size and weight as the POF-USA P-308, which is good timing, since the much smaller and lighter POF-USA Revolution very-small-frame 7.62mm NATO/.308 Win. AR replace the P-308 legacy model very soon, according to POF-USA president/CEO Frank DeSomma. Now, if you want a large-receiver POF AR, why not just move up to to 300WM?

It's DR's understanding that the POF-USA P-300 currently utilizes a Nemo Arms polymer 300WM mag (rifle magazine), and will come with one of POF's excellent rifle triggers, according to end-user preference. All P-300's come with ambi-controls. DR would probably go with POF's flat trigger for this one. Barrel length on the gun we handled was 18.5".

Anyway, Defense Review shot a quick video of Mr. DeSomma talking about the P-300 (see below), so check it out. Please also take a look at our first piece on the P-300, if you missed it.
