Have you ever **lost your car on a parking lot?** It happens. You park and go shopping. When you get back, you don't have a clue where your car is. Then you start roaming around clicking on the panic button on your car keys so the alarm goes off. **It can be frustrating,** especially on a hot, sunny day.

No, you don't need to install an expensive GPS system to keep track of your car. That's way too expensive. You would need to pay a monthly subscription fee just to use it. Don't we have enough bills to pay already?

But is there a way to track your vehicle without spending a fortune? Yes, now there is!

A California-based startup company was able to make this a reality. They created a tiny device that works with your smartphone, and it could be exactly what you're looking for!

What is it?

It's called **TrackR Bravo. (http://dailylifetech.com/order)** It is a state-of-the-art tracking device the size of a quarter. It's changing the way we keep track of the important things in our lives.

(http://dailylifetech.com/order)

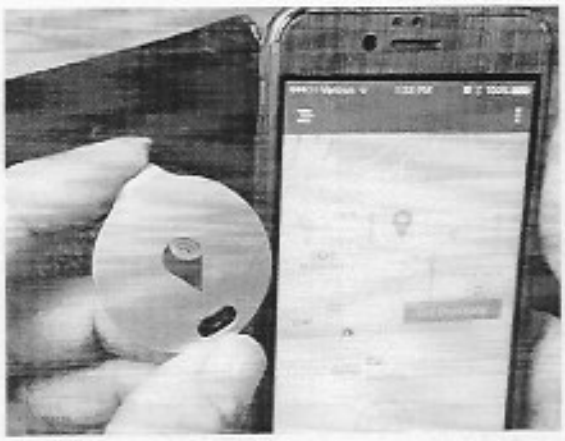

How Does it Work?

It's easy! Install the free **TrackR (http://dailylifetech.com/order)** app on your smartphone, connect the app to your device and you're ready to go! Simply attach **TrackR (http://dailylifetech.com/order)** to whatever you want to keep tabs on. The entire process of setting it up only takes 5 minutes or less.

You can attach it to your keys, briefcase, wallet, your latest tech gadgets and anything else you don't want to lose. Then use the TrackR app to locate your missing item in seconds.
