THE PURSUIT ENDS HERE

HIGH-SPEED PURSUITS CAN BE EXTREMELY COSTLY

and sometimes deadly!

ON AVERAGE, **PURSUIT-RELATED CRASHES** RESULT IN

55,000 injuries each year
Hill, 2002, FBI Law Enforcement Bulletin

360+ officer and civilian **fatalities** each year
Pursuit Safety, 2013

$1.3 BILLION in jury-awarded **damages**
AELE Law Library, Case Summaries 1988-2007 | does not include out-of-court settlements

THE COST OF HIGH-SPEED PURSUITS

- Ongoing liability exposure for property damage, injury and death
- Billions in insurance and court settlements, medical bills, workers' compensation, and lost wages
- Wear and tear plus damage to law enforcement vehicles
- Damage to public image

StarChase CUSTOMERS ARE PROVING WE CAN HELP

PAST RESEARCH DEMONSTRATES

"approximately 75 percent of [interviewed] suspects reported they would slow down...when they are free from the police show of authority by emergency lights or sirens."
Schultz & Alpert, 2010, FBI Law Enforcement Bulletin

OUR CUSTOMER DATA INDICATES

1 minute 45 seconds until suspect slows within 10 miles of posted speed limit
0 injuries, fatalities, and property damages
80+% apprehension rate
Alpert, 2013, NIJ Technical Report

[StarChase] works as advertised. It is like having a partner on board.
Arizona Agency

[StarChase] allows the officer to relax and not feel the pressure to take extra risk just to keep sight of the suspect. StarChase is an easy-to-use, reliable, and innovative tool that makes dangerous pursuits safer.
Georgia Agency

[StarChase] gives you the option to go without lights and sirens because you already know where this vehicle is heading.
Texas Agency

NO-PURSUIT POLICIES ARE INCREASINGLY COMMON

THE PROBLEM IS, the suspects get away!

After so many bad outcomes, the backlash against high-speed pursuits has resulted in many communities turning to no-pursuit policies. Unfortunately, it is highly unsatisfying to law enforcement personnel, whose ability to do their jobs is compromised.

"With a more restrictive or no-pursuit policy, 'burglars, car thieves, and non-violent felons elude police at will' and may continue on to commit other crimes."
Eisenberg, March 1999

THE COST OF NO-PURSUIT POLICIES

- Loss of public trust and support
- Reduced effectiveness due to inability to apprehend suspects
- Erosion of morale among law enforcement personnel

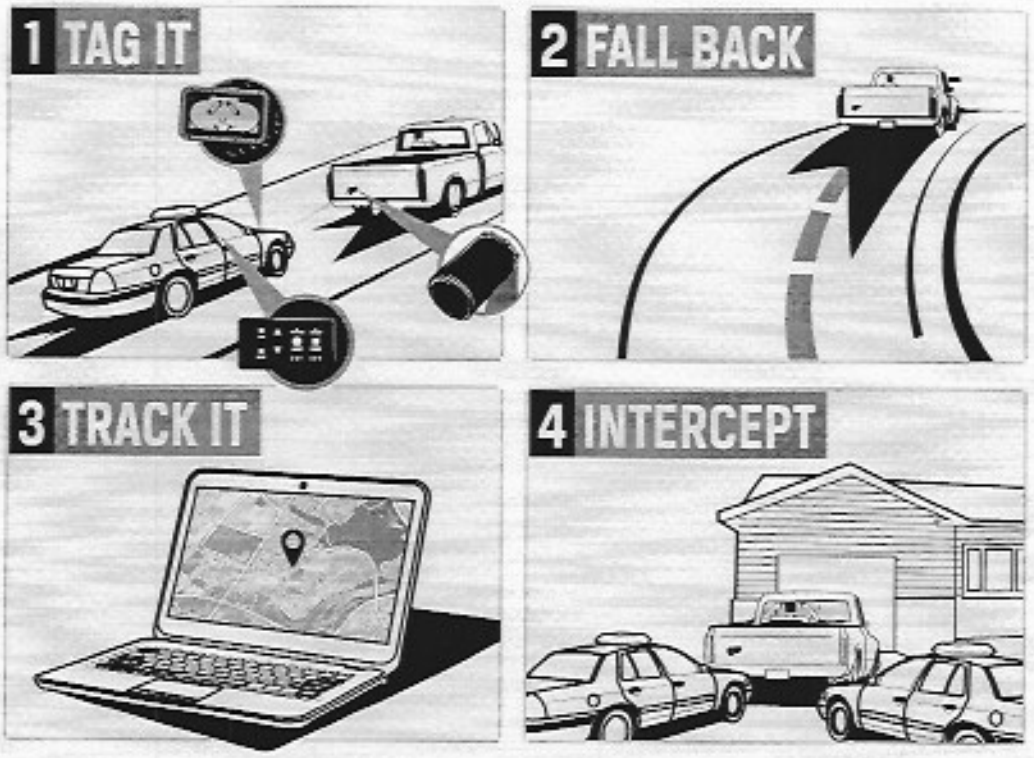

StarChase™

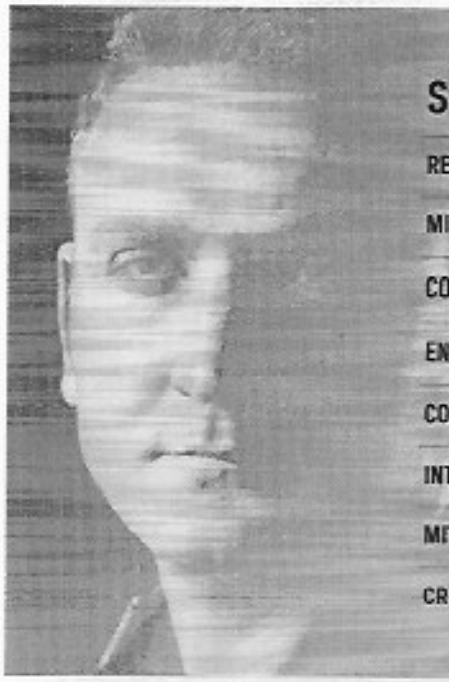

THE PURSUIT MANAGEMENT SOLUTION THAT PUTS YOU IN CONTROL

The StarChase system is a proven, less-lethal technology that provides a significant tactical advantage to law enforcement officers in failure-to-yield or high-risk flight situations. Once a vehicle is tagged it enables a dispatcher to track the suspect in real time using a web-based mapping program. The officer remains on the street, a potentially dangerous pursuit is avoided, and the suspect can then be safely apprehended.

Using the StarChase system is as easy as...

1 The StarChase compressed-air launcher deploys a GPS-embedded projectile, which
2 adheres to the suspect's vehicle – *whether moving or stationary* – and
3 transmits its location every few seconds. A real-time mapping program enables monitored tracking until the vehicle is intercepted and
4 interception of the vehicle.

StarChase effectively...

REDUCES agency and officer risk

MINIMIZES risk to life and property

COMPLIES with Fourth Amendment rights

ENHANCES apprehension of impaired drivers

CONTROLS high-risk vehicle interdictions

INTEGRATES with strict and no-pursuit policies

MITIGATES agency liability and collateral damage

CREATES court-admissible data
