Speaking of cool new S&S Precision products, the company is now the exclusive US distributor of the very interesting ACS Grenade Trigger Pouches, designed and manufactured by ACS Industries out of Israel. These include the ACS M-67 Grenade Trigger Pouch, ACS M-26 Grenade Trigger Pouch, ACS Rheinmetall Flash Bang Grenade Trigger Pouch, and ACS CTS 7290 Mini Flash Bang Grenade Trigger Pouch, which also holds the Rheinmetal MK 13 and Safariland Low Roll II.

The ACS Grenade Trigger Pouches look very well-made, well-designed, and durable. And, S&S Precision's CEO Drew Borland was kind enough to take DefenseReview (DR) through them during his quick product demo for us at SHOT

Show 2017, which you can see in the video below, starting at the 1:28 minute mark.

Borland (demonstrating in video): "They have five (5) different flash bang bodies they fit. This is the flash bang version. It's got a safety here on the side. That's one safety. The other safety is…so that's locked in. This is 'Off'. They have two trigger buttons on it. If you hit one, or the other, they don't open [demonstrates]. You have to hit both [buttons/levers] at the same time to get the grenade out [demonstrates]. On the flash bang version, it has a cord that you can tie into the pin, so that when you pull it out, it'll actually pull the pin for you. If you don't want it, you just don't put it into the pin. We also have an M-67 version, which is right here. It has the same safety on it. They have two versions: One is straight up, one is canted [in case you want it] canted for [an] ergonomic grip. So, unlock [demonstrates], two buttons [demonstrates], frag grenade out [pulls the grenade out]. And, that's the [ACS M-67 Grenade] Trigger Pouch."

As you can see in the accompanying photos and video, it's a pretty slick (and safe) design. Really cool. It therefore goes without saying, of course, that Defense Review would like to get our hands on a few ACS Grenade Trigger Pouches to play around with at some point, since we're so impressed with the system.
