Towards the end of SOFIC (Special Operations Forces Industry Conference) 2017 earlier this year, Rob Davis of Aspetto introduced DefenseReview (DR) to his next-door booth neighbor Jim Hoy of TMG (Threat Mitigation Group) Target Systems, who was kind enough to show us his very interesting steel targets for both rifle and pistol shooting. The interesting/important thing about the TMG targets are their stand-alone mechanical reset feature that allows the shooter to reset the target by simply shooting the center target. Pretty cool.

The two systems Hoy showed us were the TMG Handgun and Small Rifle Target System and the TMG Rifle Long Range Target System. Both utilize the same mechanism and are simple and user friendly. Check out DR's video below to see exactly how the system works.

Defense Review really digs these.
